**Subject: RoHS Conversion and Safety/EMC Compliance**

The changes in our products required to meet RoHS are typically insignificant relative to safety certifications, so revised or new certifications are usually not needed. In cases where the changes do require changing a report, we add them as "alternate construction". In this way, a new report is not issued, but just a revision.

EMC in our products is typically not affected by RoHS changes, but in cases where we suspect there may be an effect, we perform tests to determine continued compliance.

Our model numbering system adds a "G" suffix to signify RoHS compliance, which is covered in our compliance reports by the "\*" where \* = any suffix.

A handwritten signature in black ink, appearing to read "Mike Harris".

Mike Harris  
Sr. Compliance Engineer  
Elo TouchSystems, inc.
